New Britain, Conn., U. S. A.

CATALOGUE

NO. 49

INTRODUCTORY

TO our many friends, the American Postmasters and Lessors of Post Office quarters, we present this our latest catalogue of Post Office equipment, feeling sure that it will serve a wider purpose of usefulness and be found more complete and helpful than any we have ever issued in the past. Each passing year shows marked improvement in the income, the importance and the volume of business transacted by the American Post Offices. This progress has been carefully noted, its importance fully realized, and a constant effort has been made by us in plant, facilities and improved features of work with the net result that today our productions in the line of Post Office outfits, lock boxes and furniture stand alone at the head of the list for quality, beauty of design and finish, general efficiency and value for the money asked. Possessing to a marked degree the attributes which create superior work and service, with ample capital, our own plants for the manufacture of both wood and metal work, a reputation for fair dealing, which is testified to by hundreds of Postmasters and Lessors the country over, we come to you, not as soliciting special favor, but squarely as man to man and ask if you can afford to furnish your office without first knowing what the biggest, the ablest and the most resourceful concern in the whole Post Office Equipment Field can do for you.

We bespeak for this catalogue your careful consideration, and hope you will not fail to note the many points in which our work is manifestly superior and with these points in mind submit your specifications and let us demonstrate how, in that other important field, the question of price, we can also merit your careful consideration.

Trusting then that this catalogue will interest you and that this interest will crystallize into a specific inquiry, we are, with best wishes for your success,

CORBIN CABINET LOCK CO.

CORBIN CABINET LOCK COMPANY

TO POSTMASTERS AND LESSORS

HAVING in common with every Postmaster and Lessor the betterment and welfare of the equipment of the Post Office, we have spared no pains in making the Corbin Post Office Equipments the most complete and up-to-date in every respect.

We are the only Post Office Equipment Concern that manufacture all their own lock boxes, both the key and keyless style, therefore we leave this matter for yourselves and the patrons of your office to decide; knowing the requirements and peculiarities of your own community better than any distant Post Office Equipment Concern, you know whether you want a key or keyless style lock box in your office. As manufacturers, we strictly guarantee either our key or keyless boxes in every respect to give satisfaction to both yourselves and the Post Office Department.

We make a specialty of furnishing Complete Post Office Equipments for all classes of Post Offices, from the small office of the Fourth Class to the larger offices of the Third, Second and First Class, as well as Post Office Stations in the cities. No equipment is too small to receive our prompt and careful consideration and none is too large for our factory capacity to handle to the best of advantage.

It is to the best interests of both the Postmaster and the Lessor to have an up-to-date Post Office Equipment with plenty of lock boxes. Not only the Postmaster's salary, but the Lessor's rental is based on the receipts of the office.

THE FOLLOWING TABLE OF RECEIPTS AND SALARY ADJUSTMENT IS SUBMITTED

RECEIPTS	SALARY	RECEIPTS	SALARY	RECEIPTS	SALARY
\$1,900 to \$2,100	\$1,000	\$3,000 to \$3,500	\$1,400	\$6,000 to \$7,000	\$1,800
2,100 to 2,400	1,100	3,500 to 4,200	1,500	7,000 to 8,000	1,900
2,400 to 2,700	1,200	4,200 to 5,000	1,600	8,000 to 9,000	2,000
2,700 to 3,000	1,300	5,000 to 6,000	1,700	2,000 indicates Second Class Office	

"CORBIN" BALL-BEARING PIN-TUMBLER LOCKS

THE lock used on lock boxes Nos. 5, 6 and 7 is the "Corbin" Ball-Bearing Pin-Tumbler Lock, which contains the ball-bearing pin-tumbler cylinder, the latest achievement in invention in locks and a strictly Corbin feature, combining the greatest security with the easiest key action as shown by the cuts illustrating its construction.

To test its durability we recently fastened one of these cylinders into a machine that forcibly inserted and withdrew the key over one million times without in the least injuring the working powers of the lock or causing any perceptible amount of wear. It will last a life time, and always give satisfactory service.

Figure 2 shows the interior of the cylinder with the key withdrawn, the tumblers forming five bolts that hold the cylinder firmly in position, the balls resting at the bottom of the tumbler pockets, through which the key-way is cut. The cylinder can only be released by inserting a key so cut that it will lift each of the five tumblers to just the proper position, as in Fig. 3, so that the break or division in each will coincide with the rim of the cylinder, when the cylinder can be turned, as in Fig. 4, the lever at the back engaging the latch and unlocking the door. It will be seen that the center of each tumbler rests directly upon a ball, and when the key is introduced, the pressure upon the tumbler is directly upward instead of against the side of the pocket, as in the old style cylinder, and the friction of the German silver key is expended upon the hardened German silver ball which turns easily in its place, thus reducing the wear to a minimum and giving the least possible resistance.

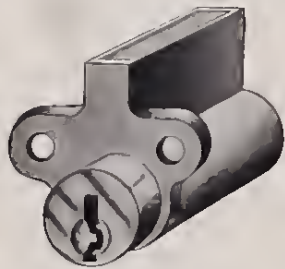

FIG. 1

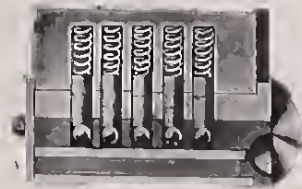

FIG. 2

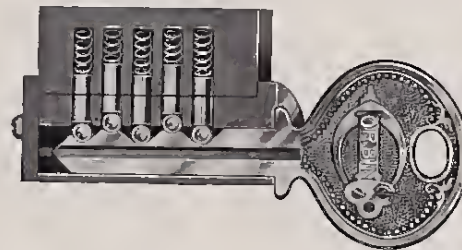

FIG. 3

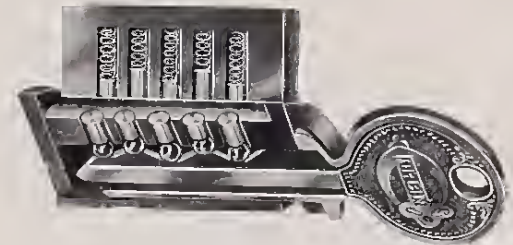

FIG. 4

When the key is removed, the tumblers are at once sent into the vacant places by the coiled springs, and hold the lock secure. If one of the five wards of the key varies five one-thousandths of an inch from the correct height, it will not operate the lock, a fact that aptly illustrates the great capacity for possible changes of key, and the absolute impossibility of opening a box secured by one of these locks, without having the key furnished with it.

An additional safeguard and increased possibility for variation in keys is found in the peculiar form of the key and key-way. Fig. 1 shows the irregular conformation of the keyhole, extending the entire length of the solid metal cylinder, and requiring a key to fit it accurately. Slots on each side of the Corbin key fit the projections on the key-way. A flat key cannot be inserted, neither can picking tools. This lock offers the very best security with the greatest ease of operation. Each is furnished with three ornamental German silver keys with gold plated bows, duplicates of which can be obtained only by Postmasters, and no two locks in the same Post Office use the same key. The locks can be operated from the inside by the Postmaster without a key, and he can either open the box or close it securely against delinquents.

CORBIN LOCKS ARE USED ALL OVER THE WORLD

CORBIN CABINET LOCK COMPANY

KEYLESS LOCKS

THE Keyless Lock System is no innovation to the Corbin Company. We have manufactured and placed on the market for many years, thousands of keyless locks for lockers, drawers, chests, cash boxes, etc.

In presenting our keyless lock boxes for Post Offices, we are not in the stage of experiment, but from our experience in keyless locks in general are able to furnish to the Post Office a keyless lock box of perfection not only in the matter of appearance but in durability, security and workmanship.

Our keyless lock boxes are simple in construction with no unnecessary mechanism to get out of order. The most simple box to operate when you know the combination, but absolutely secure and impossible to pick and open without knowing the combination. We call your special attention to our

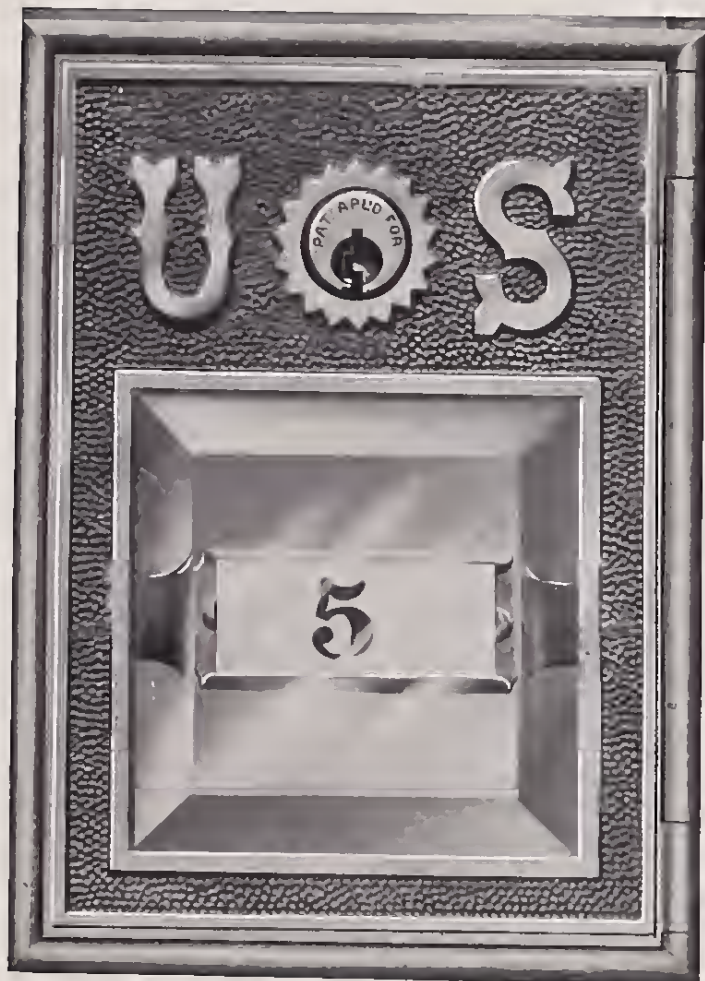

“JEFFERSON” AUTOMATIC KEYLESS LOCK BOX

This type of box is the only kind of keyless box the Post Office Department will accept in equipments under lease to the Government. The mechanism of this lock automatically throws off the combination while the door is being opened, making it necessary to operate the combination again each time the box is opened.

The Jefferson Automatic Keyless Lock Box combines the best features of every keyless box on the market also many special features which no other box can boast. We invite your attention to pages 14 and 15 for a full and better description of this box.

THE "CORBIN" KEY LOCK BOXES

No. 5 "CORBIN"
ACTUAL SIZE

The **Door and Frame** are made of the best cast bronze metal, finely finished and lacquered.

The **Finish** we make in either bright bronze natural finish or dark oxidized copper finish.

The **Lock** used is the "CORBIN" Ball-Bearing Pin-Tumbler Lock, as illustrated and described on page 4, every lock with a different key change.

Three **Paracentric Keys** made of German Silver with Gold Plated Bows are furnished with every lock.

Beveled Plate Glass is used in the doors.

Pigeonhole Work is made of best selected whitewood with either wood or perforated metal dustless bottoms.

Numbers in black and red are attached to a bronze plate which not only protects the number from being worn off, but also protects the glass from being broken by mail matter.

Hinges are flush with face of door and frame and so constructed that it is impossible to open the doors when the boxes are nested except by operating the lock with the proper key.

The **Anti-Friction Catch** on the lock bolt permits the easy closing of the door without any strain on the lock or door and is so arranged that the Postmaster can open the door from the inside.

Brass Name Clips with Numbered Cards to receive the name of box renter, are attached to the Postmaster's side of every box (no extra charge).

A **Key Board** for holding keys is furnished with every nest (no extra charge).

Duplicate Keys can be furnished by sending us the key change number stamped on the lock and key, without sending us sample key.

Stop Keys are furnished when desired so the Postmaster can lock out delinquent box renters (no extra charge).

No. 7 and 8 size instead of being hinged, are attached to a drawer, and are furnished with a double anti-friction locking device securing the drawer at the bottom as well as at the top.

THE "ACME" KEY LOCK BOXES

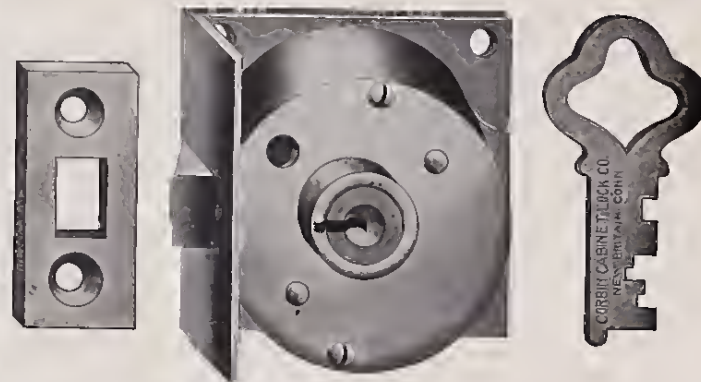

No. 30 "Acme"
Actual Size

The Door and Frame are made of the best cast bronze metal, finely finished and lacquered.

The Finish we make in either bright bronze natural finish, or dark oxidized copper finish.

The Lock illustrated herewith is made of brass with a heavy bronze cap, tube and center that is countersunk, permitting the key to enter with very little friction. Each lock has a spring bolt allowing the door to close easily and enabling the Postmaster to open the door from the inside.

Three German Silver Keys, that will not interchange, are furnished with every lock.

Beveled Plate Glass is used in the doors.

Pigeonhole Work is made of best selected whitewood with either wood or perforated metal dustless bottoms. Numbers in black and red are attached to a bronze plate which not only protects the numbers from being worn off, but also protects the glass from being broken by mail matter.

Hinges are so constructed that it is impossible to open the doors when the boxes are nested except by operating the lock with the proper key.

Brass Name Clips with Numbered Cards to receive the name of box renter are attached to the Postmaster's side of every box. (No extra charge.)

A Key Board for holding keys is furnished with every nest. (No extra charge.)

Duplicate Keys can be furnished by sending us the key change number stamped on the lock and key, without sending us sample key.

THE "WASHINGTON" KEYLESS LOCK BOXES

NO. 35 "WASHINGTON"
ACTUAL SIZE

CORBIN CABINET LOCK COMPANY

The Door and Frame are made of the best cast bronze metal, finely finished and lacquered.

The Finish we make in either bright bronze natural finish or dark oxidized copper finish.

The Keyless Lock is made of brass, and while of the simplest construction, it combines durability and security. It cannot get out of order. We guarantee it. It can be opened from the inside by the Postmaster.

The Combination can be changed in a second's time by the Postmaster and there is no limit to the number of changes. It cannot be picked. If combination is lost it can be found by the Postmaster without taking the lock apart.

The Dial is heavily nickel plated, with pointer and letters in black enamel, very easily seen, therefore overcoming the great objection in other keyless boxes.

Beveled Plate Glass is used in the doors.

Pigeonhole Work is made of best selected whitewood with either wood or perforated metal dustless bottoms.

Numbers in black and red are attached to a bronze plate, which not only protects the number from being worn off, but also protects the glass from being broken by mail matter.

Hinges are flush with face of door and frame and so constructed that it is impossible to open the doors when the boxes are nested except by operating the combination.

The Anti-Friction Catch on the lock bolt permits the easy closing of the door without any strain on the lock or door, and is so arranged that the Postmaster can open the door from the inside.

Brass Name Clips with Numbered Cards to receive the name of box renter, are attached to the Postmaster's side of every box (no extra charge).

No. 37 AND 38 SIZE instead of being hinged, are attached to a drawer and are furnished with a double anti-friction locking device securing the drawer at the bottom as well as at the top.

Prices Quoted on Application.

CORBIN CABINET LOCK COMPANY

THE CORBIN WIRE BOTTOM DUSTLESS CALL BOXES

Our Call Boxes are constructed of the best air and kiln-dried whitewood for the vertical partitions and roundabouts, smoothly finished.

The Bottoms are composed of coppered wire. The boxes having this feature are absolutely dustless and the best for call boxes that are fully protected from the public by sash and glass. They are also used in our general delivery, letter and paper boxes, but if the latter are very wide, we recommend solid bottoms.

The Numbers are in red and black on a white background, fastened upon brass plates, placed horizontally across the boxes in the rear of the glass, preventing the glass from breakage and injury to the number.

The Sash is of selected, solid, kiln-dried quartered oak, finished natural, antique or golden, and glazed with first quality, double strength, clear glass. The sash is removable for the purpose of cleaning the glass without disturbing any mail matter therein.

Brass Clips with cards numbered furnished free of cost with all boxes.

Sections of boxes are arranged eight high for Cabinets and either nine or ten high for outfits. Special nests with and without sash glazed furnished upon application.

The Call Boxes in our Equipments are the Government standard size, viz.: 3 inches wide, 5 inches high, and 8 inches deep.

SIZES OF CALL BOXES

No. 24— $2\frac{1}{8}$ inches wide, 5 inches high, 8 inches deep

No. 25—3 inches wide, 5 inches high, 8 inches deep

No. 26— $3\frac{1}{2}$ inches wide, 5 inches high, 8 inches deep

To estimate the space occupied by Call Boxes:

WIDTH—Multiply the number of boxes wide by $2\frac{1}{8}$ inches for No. 24, by 3 inches for No. 25, and $3\frac{1}{2}$ inches for No. 26, and add 4 inches for sash.

HEIGHT—Multiply the number of boxes high by 5 inches and add 4 inches for sash.

CORBIN CABINET LOCK COMPANY

ALPHABETICAL GENERAL DELIVERY LETTER AND PAPER CASES

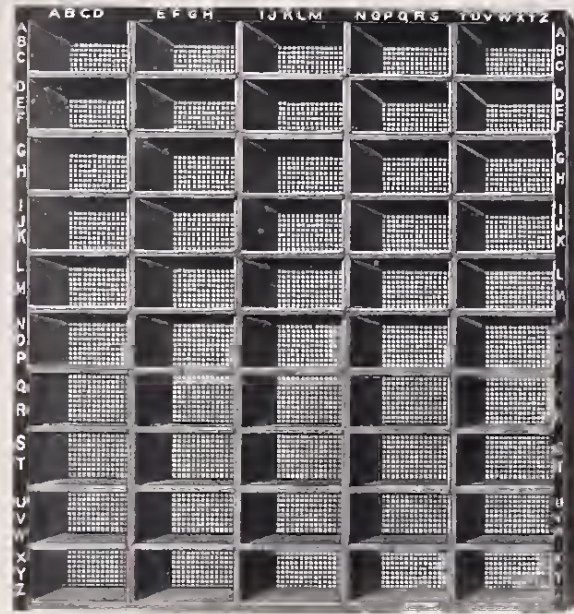

LETTER CASE

160 Boxes, 2 inches wide, 5 inches high,
6 inches deep

Letter boxes are furnished in various sizes and quantities depending on the requirements of each particular office. The boxes are 6 inches deep, 5 inches high and from 2 inches to 3 or 4 inches wide, with either wood or wire bottoms and galvanized wire mesh back.

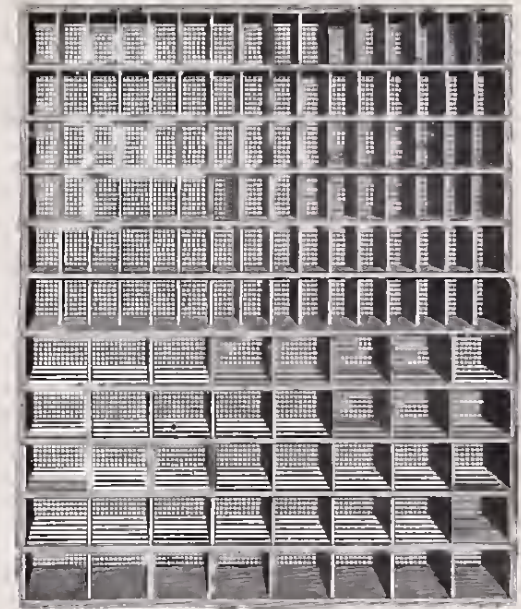

We furnish sets of alphabets so the Postmaster can arrange the lettering of the boxes to suit himself and the demands of his particular office. Either letter or paper cases or both are sometimes furnished by us on a base on castors convenient to the general delivery window.

PAPER CASE

50 Boxes, 9½ inches wide, 5 inches high,
12 inches deep

General delivery paper boxes are furnished in any quantity and in various sizes from 5 to 9½ inches wide, 5 inches high, and 10 to 12 inches in depth, and are always made with wood bottoms and furnished with a galvanized wire mesh back.

LETTER AND PAPER CASE

96 Letter and 40 Paper Boxes

Where the general delivery mail is small it can be handled in a combination letter and paper case which we make in any size and quantity of boxes to meet your requirements.

PLANS AND SPECIFICATIONS

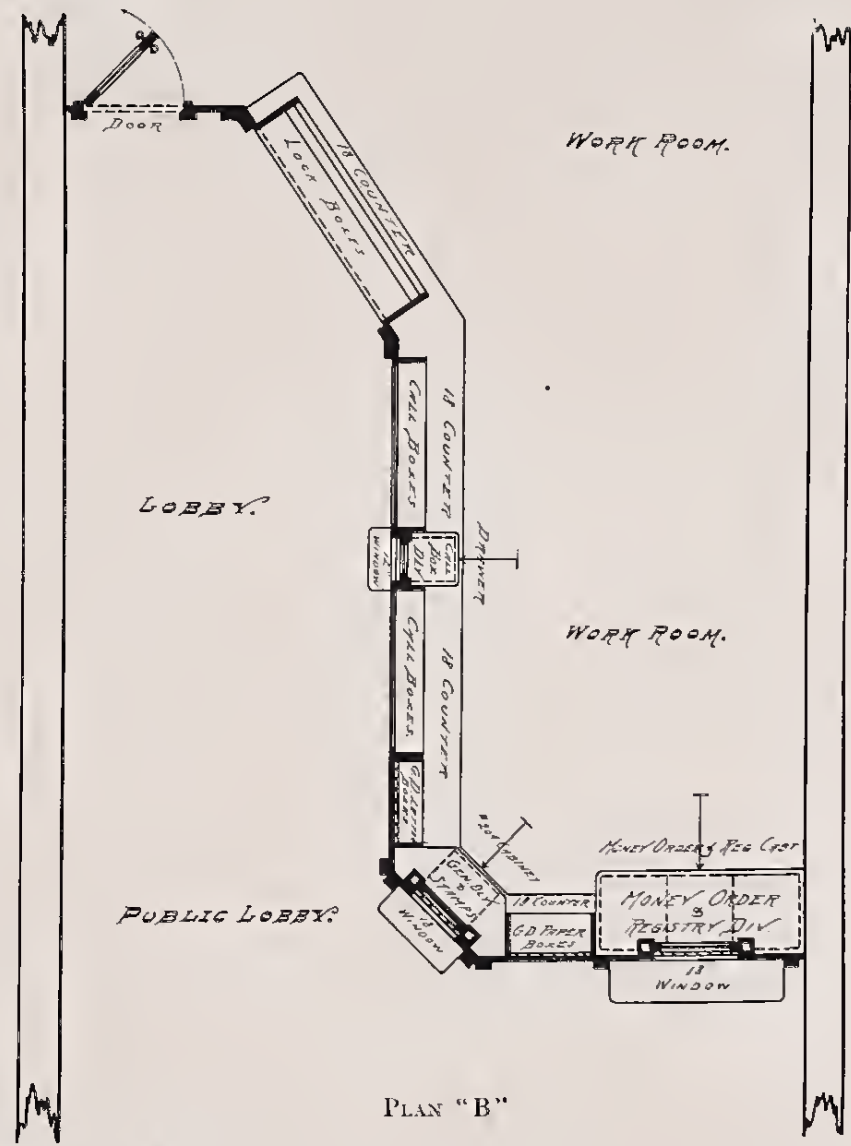

FREE of all charge we prepare plans and specifications covering special arrangement of screen work and furniture in offices of second and third classes, also for stations of government offices. Those desirous of working through a proposition of this sort should let us have a rough plan of the room, giving length, width and height, as well as memorandum of any angles or obstructions in the walls, also suggestions of how the screen work should be run. Included with this data should be a list of the furniture required for the workroom. Upon receipt of the above we will prepare the necessary plans and specifications and estimate of cost for the work gotten up in the best manner and delivered to destination. We are glad to prepare these plans and specifications for any Postmaster or person interested in leasing furnished premises to the Post Office Department. It makes no difference if proposition is in its initial stages, send the data just the same and let us demonstrate our ability to arrange a convenient office and to quote prices that for quality will be found as low as anyone can make. We are always glad to offer suggestions from our fund of experience and in many cases have been able to materially assist persons interested in working through their propositions.

On the following pages we show numerous plans. These are merely suggestions. With full knowledge of the conditions, parties interested might think of some better way in which to arrange their outfits. If so, grant our request above, let us know all about the plans in mind for the betterment of the Post Office and see if we cannot be of material aid in furnishing the practical experience necessary in such cases.

We invite correspondence from Postmasters and Lessors and can assure all interested that in coming to us they secure the benefit of long experience in Post Office matters and a willingness to help all those who are making persistent efforts for the improvement of the local Post Office.

CORBIN POST OFFICE FURNITURE

ON previous pages we illustrate and describe lock boxes, call boxes, piers, general delivery boxes and other facilities used jointly by the public and the working force of the office.

We now come to that more important field and the one subject which most interests the Postmaster—furniture for the workroom. This furniture is made up of pieces used exclusively by the Postmaster and his clerks in handling the daily volume of business. It needs no statement of ours to convince the Postmaster and his working force that satisfactory conditions “behind the screen” depend almost as much on proper furniture as upon the efficiency of the clerks. Furniture must be the latest and the best in order to handle the daily work with proper dispatch. We make such furniture, having carefully studied government plans and having based our designs on careful measurements and specifications, modifying each piece and improving it from time to time as our experience in hundreds of Post Offices would dictate. We have followed this method for years, never failing to introduce the most improved facilities provided same have proven themselves effective in actual use. Today we offer a line of furniture that is strictly up-to-date and is the last word that can be said by anyone in the way of facilities for workroom. The quality of our work shows as much our pains in construction as our insistence that same shall possess the very latest features. All pieces are constructed in a solid fashion of best oak and whitewood stock, all are well finished and are guaranteed to pass the most rigid government inspection.

LOBBY FURNITURE

No. 260. BULLETIN BOARD

No. 260. 3 feet wide, 3 feet high

Prices Quoted on Application

CORBIN CABINET LOCK COMPANY

STYLE "A." THE "HARRISON" BAG RACK
(10 BAGS)

BAG RACKS

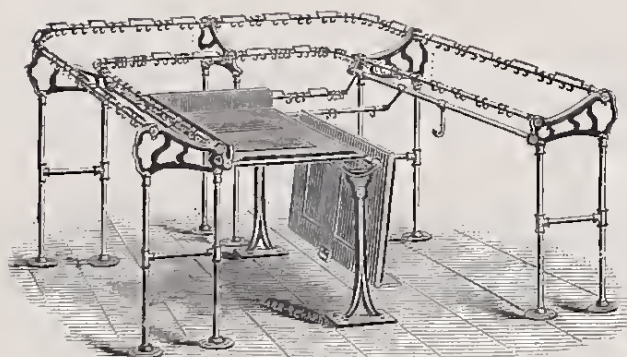

We illustrate on this page two styles of bag racks—The straight (Style "A") and the curved (Style "C"). The larger racks are all built curved form in order to bring each pouch within easy reach.

Each rack is equipped with self-adjusting hooks and label holders provided with space for inserting route card for every bag.

The drop table, furnished with each rack, is made of hard wood, finely finished, and drops down out of the way when not in use, allowing one to pass and reach any bag.

These racks are furnished in different sizes. The following are regular stock sizes:

STYLE	FLOOR SPACE
A 10 Bags (straight)	5 feet 4 inches by 4 feet 8 inches
I 14 Bags (straight)	7 feet 10 inches by 4 feet 8 inches
B 16 Bags (straight)	8 feet 6 inches by 4 feet 8 inches
C 22 Bags (curved)	7 feet 10 inches by 5 feet 7 inches
D 28 Bags (curved)	7 feet 10 inches by 7 feet 7 inches
E 44 Bags (curved)	9 feet 10 inches by 7 feet 7 inches
F 70 Bags (curved)	11 feet 10 inches by 8 feet 7 inches
G 92 Bags (curved)	10 feet 0 inches by 17 feet 0 inches

POSTAL STATION CABINETS

(FOR CITY DRUG STORE STATIONS, ETC.)

FRONT VIEW

REAR VIEW

NO. 700 POSTAL STATION CABINET
GENERAL SPECIFICATIONS

Design.—The above illustrates a handsome Postal Cabinet suitable for a drug store, and can be placed on an ordinary counter, but when desired we will furnish an oak counter at a nominal price.

Materials.—The woodwork of the front and ends of Cabinet is built of selected kiln-dried oak, paneled and moulded, with pilaster finish and carved mouldings. The glass panels are either clear or obscure chipped as preferred.

Wicket.—The wicket opening, $14\frac{1}{2}$ inches wide x 24 inches high, is furnished with a polished brass grille arranged to slide up. A locking device on the inside gives security to the cash drawer.

Sign.—A designation plate of solid bronze **U Postal Station S** is placed above the wicket.

Finish.—These Cabinets are highly finished in natural color, antique or golden, and hand rubbed—the best there is.

Shelves.—This Cabinet has commodious outside and inside shelves, firmly secured by brackets.

Pigeonholes.—Of different sizes for holding registry cards, stamped envelopes, wrappers and small blanks, properly labeled with cards inserted in polished brass plates placed over the wicket.

Drawers.—We arrange beneath the shelf one blank drawer and two drawers for cash, provided with sliding coin cups and compartment for bills. The money order and stamp cash must be kept separate in every instance. Each drawer is secured by Corbin locks alike, so that one key will pass them all.

Storage Space.—Large shelves for holding blanks, as illustrated.

Dimensions.—Cabinet, 40 inches wide, 48 inches high, 19 inches deep. Counter, 40 inches wide, 30 inches high, 19 inches deep.

Prices Quoted on Application

No. 2

Black Japanned Finish
Also all hardware finishes

No. 2417

Black Japanned Finish

No. 1700

Polished Brass or Bronze
Also all hardware finishes

Recommendations of the Post Office Department in Regard to House Letter Boxes

The Post Office Department has issued the following statement in reply to inquiries from various parts of the country in relation to the use of house letter boxes:

"Whereas the Post Office Department has no legal authority to require the establishment and use of private mail boxes, experience shows that the general employment of such boxes would greatly facilitate the delivery and receipt of mail, especially in the large cities. In the smaller towns Post Office patrons have not hesitated to provide these private receptacles for the receipt of mail after having learned to appreciate their convenience and the extent to which they insure the prompt delivery of mail. The Post Office Department recognizes the fact that private boxes, particularly in large cities, would mean the saving of much time lost by carriers now compelled to ring door bells and wait long intervals for responses to their calls. It is estimated that in some cities carriers lose from one hour to one and one-half hours each day by being forced to wait when delivering mail. This loss multiplied in thousands of cases, spells a vast amount of money. Private mail boxes retail at a small price."
